

# Carbon Reduction

## Reducing carbon emissions is a critical for a net zero future.

Paragon commissioned an independent report to determine emissions reduction by industry adoption of the Tru-Fit® small bore tubing inspection system.

The report concludes that adoption of Tru-Fit® will reduce carbon emissions by 250,000 tons annually across the UKCS – the same amount taken up by 1 million trees.

Tru-Fit® will help reduce carbon emissions by preventing leaks, fugitive emissions and increasing production efficiency across the UKCS playing a part in the drive to deliver a net zero North Sea.
